

Inspirations for RegenerActions

Paths towards solutions

A Training Package

Co-funded by
the European Union

What is this training package?

It is one of the **results** of RegenerAction, a 2-years Erasmus+ project from December 2022 to December 2024 in the field of Vocational Education and Training. The training contents have been designed to address the **training needs of Urban Community Builders**, aroused from focus groups, living labs and informal conversations.

Why Inspirations for RegenerActions?

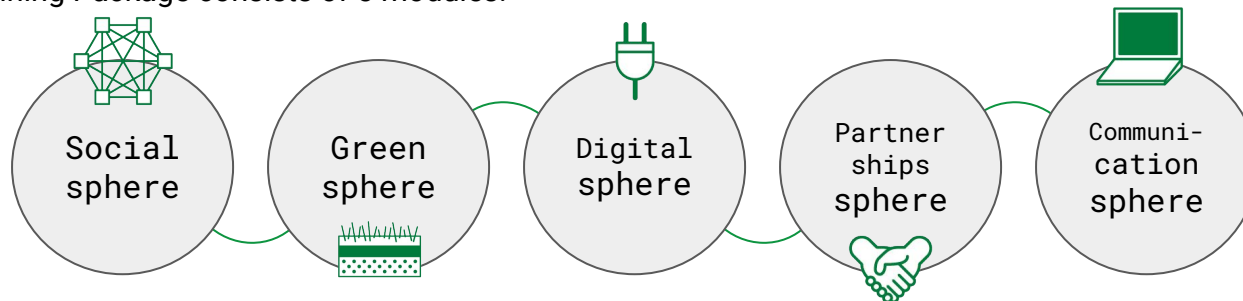

This Training Package contains a set of **inspiring concepts, case studies and methodologies** aimed at *inspiring* and gathered during the Regeneration Living Labs started in February 2024, and still ongoing, **at the forefront of innovative urban design** which applies co-governance, democratised technologies and a multispecies approach.

Why Paths towards solutions?

The 5 modules of this Training Package are aimed at inspiring Urban Community Builders regarding **paths that contribute to build solutions to major contemporary challenges** for our communities and cities. We need to undertake such paths together by building a critical mass around them, to achieve positive impact, faster.

How is it structured?

This Training Package consists of 5 modules:

Although they are **intertwined**, we propose to explore them one by one, as they gather the **expertise of people** who contributed with their **knowledge and experience** from 2022 to 2024, especially during the Living Labs which took place in Evora (Portugal), Valencia (Spain), Rijeka (Croatia), Matera (Italy) and Paris (France).

These modules are not intended to be comprehensive and exhaustive of spheres that are vast and ever-evolving, this is why at the end of each module you will find a reminder to become part of our **community of knowledge** by contributing to our

[REGENERATION contributive folder](#), 

a shared, open, cloud space where you can contribute with thoughts, ideas, materials, suggestions, readings and other inspirations for *Regenerations*.

Who can use it?

The Training Package has been designed for individuals, associations, cooperatives or any NGO, but also Municipalities, Regions, enterprises, vocational education and training providers, University professors, school teachers and folk universities who are looking for easy-to use and adaptable training contents to:

- reskill;
- upskill;
- reinforce knowledge.

We are open to proposals about:

- reuse and adaptation of the modules;
- formalisation of the training courses with a final certificate.

Please reach out to regeneration@iri.centrepompidou.fr and/or sarasimeone@materahub.com for any enquiry.
